

For activation of your license kindly please send us the License Request File(**WibuCmRaC**) produced with your CM-Stick. You'll then receive the CM Remote Update File (**WibuCmRaU**) for activation of your license.

1. Create License Request File (WibuCmRaC):

Open the CodeMeter Control Center and select the CMContainer Bieser und Partner.

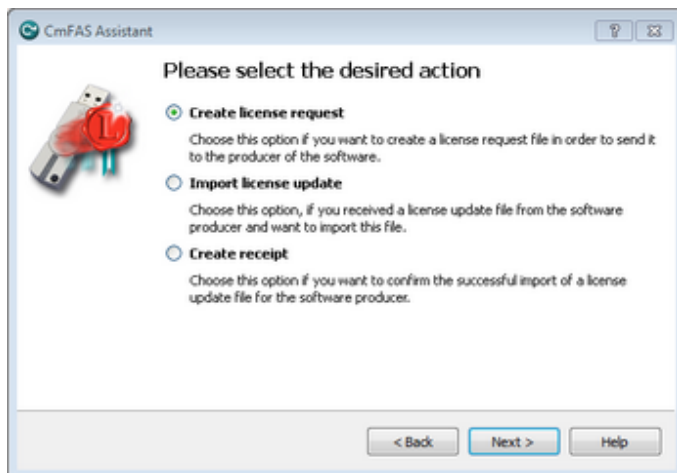

Click on the "Update License" button

The CodeMeter Field Activation (CmFAS) Assistant opens with a welcome dialog.

Click the "Next" button.

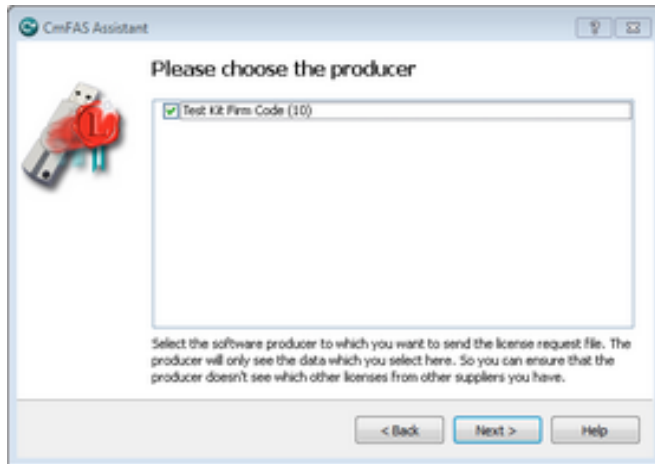

Select the option „Create license request“. After your selection click the "Next" button

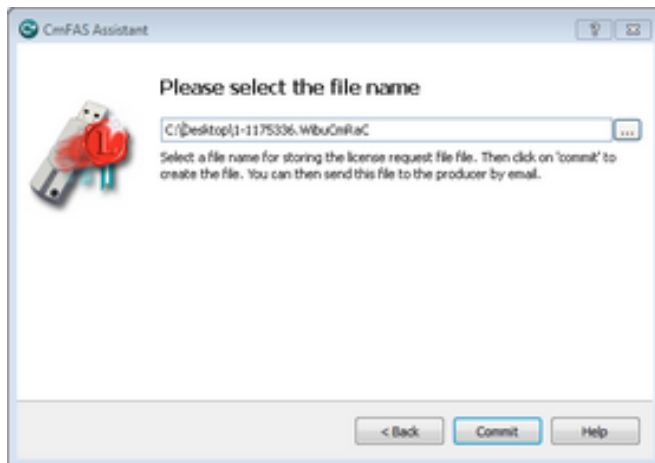

On creating a license request, you select “Extend an existing license”. After your selection click the "Next" button.

Select the Firm Code 100445 (Bieser und Partner) to create a license request. After your selection click the "Next" button.

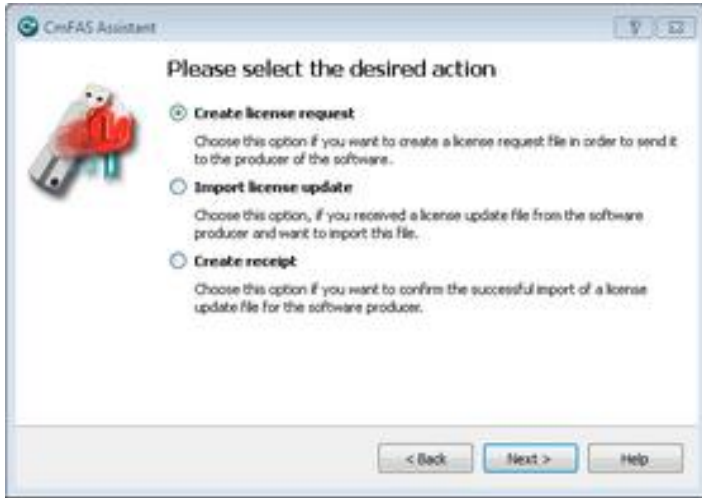

The next dialog allows you to save the license request file to a desired location. Then click the "Commit" button to create the file. This file you then can send by e-mail to support@winwasi.de.

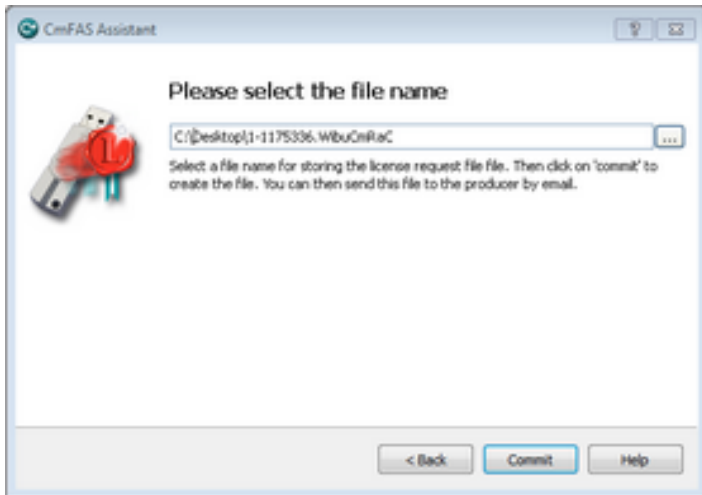

Finally, a dialog displays which confirms the successful creation of the license request file. Click the "Finish" button to close the dialog.

2. Import License Update File (WibuCmRaU):

In order to import your license update, select the option "Import license update". Then click the "**Next**" button.

In the next dialog, select the file name you used when saving the license update file you received from us. Then click the "**Commit**" button to import the license update file.

The following dialog confirms the successful import. Optionally, you can send a receipt to us. This option you also have in the start menu. Click the "**Finish**" button.
